STEPLITE[®]X

ultimate comfort

a unique blend
of ingredients
and its innovative
processing

NEOTANE[®] Technology is the combination of a unique blend of materials and the innovative way of processing it. The high performing NEOTANE[®] material has been developed based on over 55 years of experience and the feedback from millions of end users. For decades we have been working together with the best equipment suppliers guaranteeing us high quality products made with NEOTANE[®] Technology.

“2 days ago a forklift accidentally ran over my right foot. Lucky for me I was wearing my Bekina[®] Boots.”

B. Fauchron, farmer.

- 1 Sealed front: strong and impermeable on the outside
- 2 Tiny air bubble structure: light and insulating
- 3 Self-regulating thermal process on the inside

COMFORT: LIGHTWEIGHT

Our boots made with NEOTANE[®] Technology are significantly lighter than boots made of other materials. The weight of boots has a direct impact on the comfort one experiences whilst wearing. Standing a significant part of the working day, agri workers can experience an intense feeling of fatigue in the lower back and legs at the end of the day. In the long term this is negatively influencing their productivity. It is proven that agri workers with lightweight safety boots are experiencing significantly less fatigue.
